WHAT IS METABOND

Metabond has developed a comprehensive blockchain-based NFT and Launchpad platform. A decentralized NFT system allows users to secure a part of a long-term, **stable crypto investment** strategy. With the latest super-simple **#collect2earn model**, Metabond provides users with easy access to the entire crypto space.

The investment strategy helps us ensure that **holders of our Bondfield(BFC) NFTs earn a regular passive income.**

Metabond creates a value-added NFT product for beginners and professionals alike. It adds value to the NFT backed by a pool that acts diversified in the crypto market through the latest DeFi liquidity protocols.

**CLAIM BUSD
REWARDS**

The decentralized cryptocurrency market continues to grow at an unprecedented pace, with smart contracts being one of the most promising technical solutions. The NFT market is still in a strong growth phase, and will increase exponentially in the coming years. Metabond understands the trend and offers users a platform that aims to be the gateway to a successfully diversified investment strategy. A bridge between NFT holders and the decentralized financial sector.

The value proposition and use case of the NFTs Metabond hosts is unique and also leaves a lot of room for the company to continue to grow sustainably.

There are still obstacles to overcome for the industry to reach its full potential. Metabond has developed a **new decentralized NFT system** to provide users with easily accessible passive income.

"The combination of collecting, investing and networking makes the Metabond platform unique and offers members a real use case."

Marcel H. Co-Founder

To pay out capital in the form of \$BUSD Rewards, proceeds from NFT sales are deposited into a pool that Metabond invests in various investment vehicles and manages in a diversified manner. The resulting profits are paid out to NFT holders as \$BUSD Rewards. The investment strategies build the pool by increasing the value of the pool itself, resulting in an ever-growing sum. The goal is **to reward long-term NFT holders with higher \$BUSD Rewards** from the pool. (See \$BUSD Rewards).

Users working with the Metabond platform benefit from their **years of experience as successful investors and developers**. For many, it is often a challenge to navigate the vast crypto world. However, Metabond simplifies this option, allowing individuals to buy one or more NFTs on the platform and earn their rights to the rewards of Metabond's sustainable investment strategy. This **allows users to earn a high long-term income** as long as the NFT is not sold.

USECASE

Problem

Metabond has uncovered several problems faced by novice and advanced crypto investors within the NFT and investment strategy communities.

In fact, most NFT projects have no real added value. Many NFTs are launched in the "hope" of hitting a trend and generating hype. **But 98% of NFT projects are useless** and add no real value to the owner.

It is difficult for a user to bet on the right NFTs. Unfortunately, it is also difficult for an investor to develop a sound investment strategy. There are too many options and too many risks. In addition, people who want to invest often don't have time to do research, so they're not ready to get started.

The solution

Metabond covers all of these problems and provides a concrete use case.

Bondfield NFTs are tied to the rights of the \$BUSD Rewards Pool. Without a token of their own, \$BUSD are distributed to the user every month, which can be exchanged for FIAT via e.g. Binance and paid out to their own account.

Through **the simple collect2earn model** and the experts at Metabond + Partners, users can be sure that their money is invested and managed in a diversified strategy across the crypto space. The process saves investors an incredible amount of time and prevents the risk of a quick total loss. Moreover, MetaBond's NFTs are linked to an ROI that determines the minimum price. Due to the intelligent investment strategy, the value of the pool increases and pulls up the minimum price of the NFTs.

#collect2earn

\$BUSD REWARDS

Through the simple **#collect2earn model**, we facilitate the user's access to an investment strategy that generates returns.

By purchasing and collecting various NFTs (Bondfield NFT) and the resulting \$BUSD Rewards, the user creates **passive income** designed for long-term sustainability. Metabond's \$BUSD Rewards are unique and serve to generate great value for the user's NFTs. **Expected annual \$BUSD Rewards range from 240.00 to 720.00 \$BUSD per BFC-NFT (small landplot)**, depending on market trends. The larger landplots (medium and large) give correspondingly higher rewards.

As long as the user holds the BFC NFTs in his Wallet, he is entitled to the Rewards. When a user sells his products/NFTs, he also sells his rights to Rewards. The \$BUSD Rewards must be claimed via WEB3 Wallet (Metamask, TrustWallet, etc.).

The profits from the investment strategy will be divided as follows:

NFT-OWNER	AFFILIATE-POOL	COMPOUNDING	MARKETING	TEAM&DEVELOPMENT
70%	10%	5%	5%	10%

Metabond follows a safe and stable strategy. As a result, the user, experienced or beginner, secures the rights to the \$BUSD Rewards of the diversified investment strategy of absolute experts. **The Rewards can be claimed 2x a month.**

Here you can see in detail the distribution of funds from the NFT sale:

The investment strategy provides for a **monthly reinvestment (compounding)** of 5% of the profit in the existing pool. The monthly compounding is expected to increase the value of the pool over the long term. Rewards will be generated through a solid long-term investment strategy in **DeFi, Lending, Staking, NFT, Metaverse, P2E-Scholarship, Trading and the ICO/IDO space**. Twice a month, the BFC-NFT holder can claim their rewards on the platform via the wallet (Web3 wallet) where they hold the NFTs. Depending on the level (MBP) and number (BFC) of NFTs, taxes between 1%-15% are deducted.

The rewards are paid out in \$BUSD.

The \$BUSD can also be used to level up the MBP-NFT and earn more.
(see *Metabondpass*)

The second, but most important NFT drop is the Bondfield landplot NFTs (BFC). With this drop the user secures a piece of land in our metaverse city Bondfield. A beautiful modern city that offers the user a piece of freedom. The city should serve as a symbol for our project and our vision. To generate a piece of freedom through passive income is the vision of Metabond. Immerse yourself in the beautiful city of Bondfield!
(see *Bondfield NFTs*)

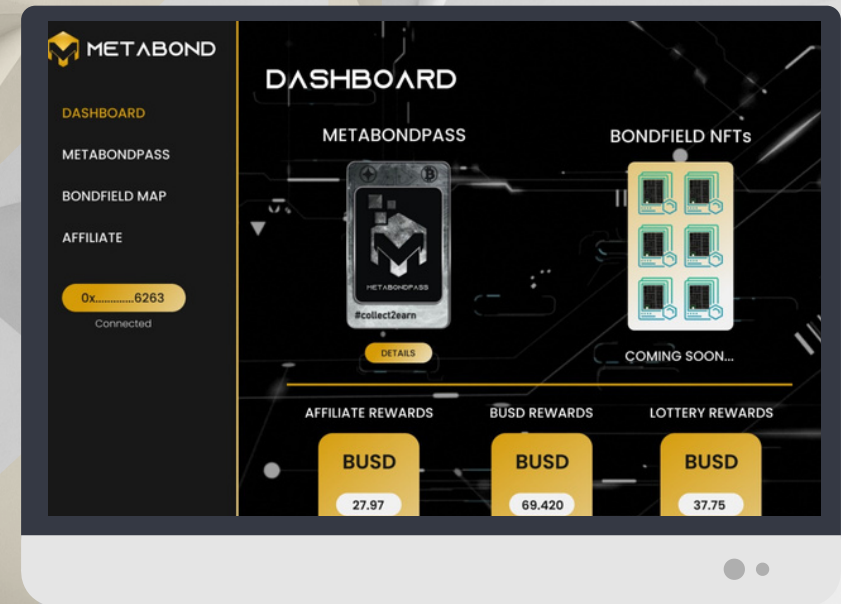

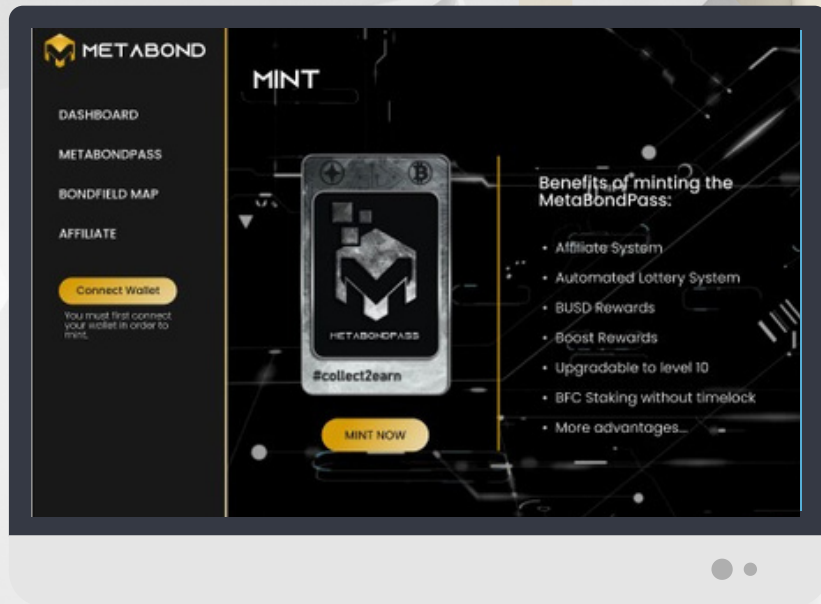

DAPP DASHBOARD

The Dashboard serves as an overview of the purchased NFTs on the Metabond platform and is an important tool for every user. Here we can see the map of Bondfield, the Affiliate section, The Lottery, and the overview for Metabondpass. Our DApp can be accessed decentrally through the Web3 Wallet.

The dashboard shows which collection the NFTs were purchased from, along with the floor price of the NFTs and a link to the official NFT marketplace. More details about the NFTs can be found here. NFT holders must contribute their NFTs to the Staking Pools in order to benefit from \$BUSD Rewards.

METABOND PASS

MBP-NFT (Metabondpass) is a series of 5000 unique NFTs composed of 33 different designs, randomly combined with each other. In addition, there are 128 super rare "Gold Passes". This results in a rarity value and ranking system, which has no direct influence on the system, but serves the collector value.

If the user buys the Metabond Pass already in the pre-sale, he secures a whitelist place in the Bondfield NFT Landsale and all future projects.

The Metabond Pass provides the owner with the following benefits on the platform:

- Whitelisting for new projects/partners
- Automated Lottery Booster
- Increase \$BUSD rewards
- Enable Affiliate System.
- Increase Affiliate Rewards for
- Preference for mining.
- 10 Level upgradable. (7 days cooldown)

NFT Data

Binance Smart Chain

ERC-721 Token

Total Supply: 5000

Whitelist Mint Price: 45 \$BUSD

Public Mint Price 50 \$BUSD

The Metabondpass offers the user **the possibility of many advantages**. If you want to work with Metabond in the long term, buy the pass **to earn more**. You can trade the Metabond Pass publicly on the NFT marketplace. However, if you sell your Metabond Pass, you lose the rights it brings with it.

METABOND PASS

Metabond Pass (MBP) NFTs can be leveled up to bring more profit to the owner. Metabond Passes **come with properties and rarity**. If a user is lucky enough to mine a **"Golden Metabond Pass"**, it is equivalent to a level 10 Metabond Pass. Since the MBP has different properties, it will result in a randomly generated NFT, which may occur less frequently or more frequently. During this period, collectible value is created in addition to the levels and valuable features that an MBP brings. Each level costs a certain amount in \$BUSD.

By leveling up the Metabond Pass, reduces his MB-Tax, which is deducted 2x per month from his \$BUSD Rewards.

A Metabond Pass level 5 or higher increases the Affiliate Rewards. These can be upgraded up to 10% (Level10). Furthermore the tickets for the Automated Lottery (ALS) can be increased.

The leveling up is stored in the metadata of the NFT, which means, that after a resale the levels will be preserved. The decay time is seven days. It is possible to level up the MBP NFT once a week. Each level costs a certain amount of \$BUSD.

MBP	Price in \$BUSD	MB-Tax	Affiliate Rewards	Lottery Tix per week/nft
Level 0	--	15%	5%	0
Level 1	1.-	14%	5%	1
Level 2	2.-	13%	5%	1
Level 3	3.-	12%	5%	1
Level 4	4.-	11%	5%	1
Level 5	10.-	10%	5%	1
Level 6	6.-	8%	6%	2
Level 7	7.-	6%	7%	2
Level 8	8.-	4%	8%	3
Level 9	9.-	2%	9%	3
Level 10	20.-	1%	10%	4

*the MB Tax goes directly into the Automated Lottery jackpot

5.0

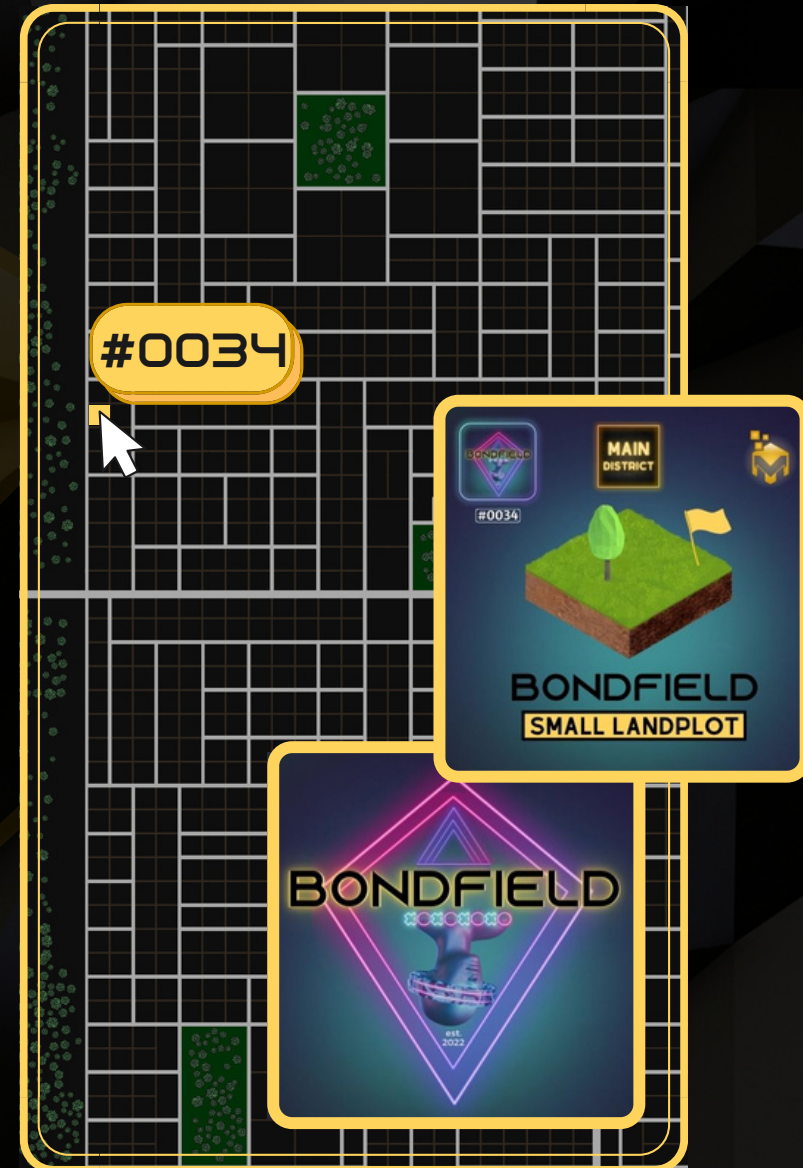

The City was formed with the goal of allowing every property owner in the City to earn passive income from their property. The city is in the formation phase until all plots are sold. There are **2500 small plots, 200 medium plots, and 100 large plots.**

BFC NFTs (Bondfield Properties) can be upgraded during the development and incorporation phases. Once the foundation phase is completed, owners can design their own plots. **They can build what they want**, and they can also choose to market their land. The user can exchange their BFC NFT for buildings on that particular plot. Metabond works with the highest NFT standards, so the community is interactive and evolving.

There are endless possibilities available! This creates a city that comes to life more and more.

Within Bondfield, there will be many more opportunities to increase your Rewards. City development is constantly being updated and will also be included in the whitepaper.

BONDFIELD

#collect2earn

www.metabond.capital

Why NFTs?

Possession of an NFT is unalterable and uniquely verifiable. An NFT can be anything, such as a deed, ticket, art, music, fund, etc. We see this as an opportunity for the owners of our NFTs to cover several benefits simultaneously. The market capitalization of NFTs will double again in the next two years.

"The true value of the NFTs is yet to emerge. For Metabond, an NFT is more than just a "picture" or a "funny monkey. Our NFTs generate profit and increase in value."

Mike "Don Crypto" Co-Founder

It's undoubtedly set to be viewed as a collectible; in that sense, **purchasing an NFT is an investment in itself**. Secondly, it is unique because of the opportunities it can offer us for long-term passive income as long as one owns and holds the NFT.

The possibilities of BondField development are without limits. **In this city, it's possible to create stores, games, meeting places, and other areas of monetization.**

The NFT technology as an instrument of proof is ideally suited to generate long-term stable growing value. Our NFTs generate profit at all times through Metabond investment strategies.

Bondfield NFT (BFC)

The Bondfield NFT project includes individual parcels of land in the City of "Bondfield." This NFT is an "interactive" NFT with the ability to change over time. On the dashboard, the NFT holder will find a map where he can find his plots. On the first sale, only the 2500 small plots will be mintable, and **the buyer secures his \$BUSD Reward right.**

NFT Data

Binance Smart Chain

ERC-721 Token

Total Supply: 2800

(2500 small, 200 medium und 100 large)

Whitelist Mint Price: 550 \$BUSD*

Public Mint Price 600 \$BUSD*

**small landplots*

Bondfield (BFC) NFTs cannot be leveled up like the MBP. To enjoy rewards, users must simply keep their BFC NFTs in the wallet.

The BFC NFTs in combination with the MBP NFT activate the Automated Lottery (ALS). Depending on the level of the MBP NFT, the holder can increase their lottery tickets.

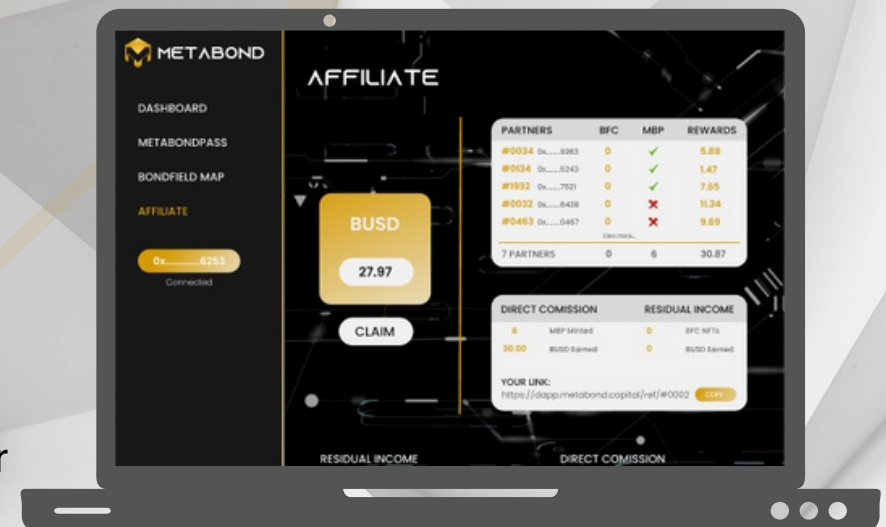

AFFILIATE PROGRAM

Metabond offers users an attractive smart contract-based partner program. This is profit-based and applies equally to all NFT projects on the platform. **The purchase of a Metabond Pass NFT requires the activation of the partner program.** Metabond only remunerates direct affiliates. Affiliate Rewards also come from the profits of the Metabond investment strategy. When a user brings affiliates to Metabond, **they receive up to 10% of the return an affiliate receives on their \$BUSD Rewards.** In addition, you will receive a **direct commission of 5% on the purchase of the MBP.** Bondfield NFTs are launched with no direct commission.

UP TO 10% ON DIRECT PARTNERS

Our affiliate program is valid for all NFT projects on MB platform that are launched on Metabond. This means you keep your affiliates for subsequent projects as well, and the structure remains the same. **10% of the monthly generated rewards go to our affiliate** program, providing the user with additional income. The rewards are deducted from the gross profit every month. The affiliate program cannot be manipulated, changed or re-placed!

*No one is obligated to participate in this program; there is no downside to not participating.

AUTOMATED LOTTERY

Automated Lottery System (ALS)

The lottery takes place every month and is drawn among all eligible NFT holders. Every month there are 36 sure winner tickets.

The jackpot is filled from various sources. **One source is the MB-Tax**, which each Bondfield Land owner gets deducted from his \$BUSD Rewards depending on the level of the MBP-NFT. Other surpluses also go into the jackpot and thus back to the user.

TICKETS CANNOT BE PURCHASED, these are obtained exclusively through the use of the NFTs.

Our lottery system cannot be manipulated, ticket distribution cannot be influenced, everything is defined in a Smart Contract and fully automated.

Tickets

Each MBP-NFT holder (from level 1) receives 1 ticket per week per BFC-NFT in the wallet.

- **Ticket number can be increased by a higher level of MBP-NFT.**
- **Winners will be drawn from the distributed tickets.**
- Winnings will be distributed every month, the jackpot pool will not be increased.
- Participation is not mandatory, but automatic if requirements are met.
- Tickets are distributed through BFC NFT ownership only.
- Winnings are paid in \$BUSD and must be claimed by the user from the ALS pool.

AUTOMATED LOTTERY

Example

One ticket wins 50% of the jackpot pool

Five tickets win 20% of the jackpot pool

Ten tickets win 15% of the jackpot pool

20 tickets win 15% of the jackpot pool

In each round **36 lottery tickets are drawn.**

Example:

The sum in the jackpot pool this month is 1913 BUSD.

Division of the jackpot pool

50% -> 1 ticket -> **956 \$BUSD** for the Winner

20% -> 5 tickets -> **76.53 \$BUSD** each Winner

15% -> 10 tickets -> **28.70 \$BUSD** each Winner

15% -> 20 tickets -> **14.35 \$BUSD** each Winner

The sum in \$BUSD is available for the winners to claim in the Dashboard.

Our roadmap is fundamentally different from other roadmaps. **We have set milestones to be achieved to move to the next development phase.** First and foremost, Metabond focuses heavily on marketing, while the team is quietly working on the smart contracts and dashboard in the background. Thus, we can grow together with the community and develop together. It also ensures that the necessary points are reached for the corresponding development, reducing the pressure while increasing the quality of the products.

The only financial transaction between the Buyer and the Metabond Company is limited to the initial minting and purchase of the Non Fungible Token (NFT) on the BSC (ERC 721) Blockchain. There is no other financial contract or implied relationship, financial or otherwise, between the buyer and the Company or the founders of the Company.

Metabond (MB) does not make, and hereby disclaims, any representations, warranties or guarantees of any kind (including implied warranties) to any person or entity, including, without limitation, any representations, warranties or guarantees arising from or relating to the truth, accuracy or correctness of the information in this document and the MB Ecosystem or MB's future platform. MB shall not be liable for any indirect, special, incidental, consequential or other loss of any kind, whether in tort, contract or otherwise (including, without limitation, loss of revenue, income, profit, use or data) arising out of the adoption of this document.

The MBP (Metabondpass) and BFC (Bondfield) NFTs are a stand-alone collection and the purchase thereof is an independent transaction and is unrelated to the election of the use of proceeds by the founders of the Company. This document or any part thereof does not constitute a prospectus or offering document of any kind and is not intended to be an offer of securities or a solicitation of an offer to purchase securities in any jurisdiction. regulatory guidance of its domicile/tax residence.

DISCLAIMER

Potential purchasers of MB NFTs should carefully consider and evaluate all risks and uncertainties associated with the market for MB – NFTs, the MB ecosystem and the MB platform, as the digital asset market is a volatile and risky market. These risks and uncertainties may include, but are not limited to, the following: Risks related to the value of the MB NFT; risks related to competitive conditions; risks related to blockchain technology and software, including delays, disruptions, errors, losses, advances and changes; security risks related to access to and use of digital wallets and blockchain applications; risks related to the development of the platform and implementation of business strategies, including reliance on collaborators and third-party service providers; political or governmental risks, including changes in applicable laws, regulations and rules; and enforcement actions. If such risks and uncertainties materialize, these events may materially and adversely affect MB, and you may lose some or all of the value of the MB NFTs.

This document does not constitute legal, tax, regulatory, financial, accounting or other advice and is not intended to be the sole basis for any valuation of MB, MB – NFTs, the MB ecosystem or the MB community. Prior to acquiring MB-NFTs, a prospective purchaser should consult legal, investment, tax, accounting and other advisors to determine the potential benefits, burdens and other consequences of such transaction. Likewise, it is the responsibility of the purchaser to observe and respect the regulatory guidance of its domicile/tax residence.
